-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8, 11, 15-18 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Driesen et al. (6,141,819).

Driesen et al. disclose a brush 45 comprising twisted or braided fibers 1 extending from the brush in supportive interengagement (see, e.g., Figs. 1a, 2a, 3a, 4, 5 and 6; col. 4, lines 21-65; and col. 5, line 56 - col. 6, line 6). The bristles comprise a relatively stiff support fiber and less stiff additional fibers (see, e.g. Fig. 2b). The fibers are of different materials, diameters, and stiffnesses. The fibers may be polymer and have a diameter of .003 inch. The fibers may be enveloped in a hollow support fiber 22. The fibers may comprise spiral fibers and/or braided fibers. The brush is at least capable of being used to apply cosmetics if so desired.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9, 10, 13, 14 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Driesen.

Driesen discloses the claimed invention except for the fibers being formed of a microfiber material. It would have been obvious to one having ordinary skill in the art at the time the invention was made to form the fibers of a microfiber material or of any of numerous other known materials, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416. It also would have been obvious to provide the support fiber with a diameter in the range of .005 to .020 inches and to provide the other fibers with diameters of .001 inches or diameters in the range of .0005 to .0015 inches, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

Response to Arguments

Applicant's arguments with respect to claims 1-9 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claim 12 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
